ANNUAL CSR REPORT 2022

ABOUT Q-PARK

PROFILE

Q-Park is a leading off-street parking infrastructure owner and operator with well-managed commercial parking facilities across seven Western European countries.

The off-street parking spaces we operate are mainly owned by us or under concessions and long-term leases from public and private landlords.

We demonstrate that effective regulated and paid parking combined with seamless services make an economic and sustainable contribution to cities and society, and that a positive parking experience impacts how people enjoy their visit, journey, shopping, commute or residence.

Our vision

Q-Park aims to be the preferred and most recommended parking partner at strategic locations in Western Europe, based on functional quality, operational excellence, customer satisfaction, and sustainable financial performance.

Our mission

We enhance urban liveability by providing clean and safe parking facilities, based on convenience, reliability and hospitality.

Our strategy

To provide a response to external events and market trends our plans are built on five strategic pillars:

- I portfolio of strong locations;
- I differentiated contract types and propositions;
- I digital, commercial and pricing capabilities;
- operational excellence, and
- I sustainable mobility partnerships.

By applying innovative technology and by working together with strategic partners, we offer profitable and sustainable parking solutions. Our sustainable solutions include Mobility Hubs and EV Charging Points.

Our value

By offering a substantial portfolio of parking facilities in urban areas throughout Western Europe, we contribute to accomplishing sustainable urban mobility by balancing individual and societal needs.

On the one hand, there is an individual need to travel for educational, economic, social, living and leisure purposes – whenever possible and without hassle. On the other, there is a societal need to improve the liveability of cities, increase safety for pedestrians and cyclists, provide access to green and public spaces, support economic development, and to offer affordable and equitable access for all.

Value for customers

With our portfolio of parking facilities in or near multifunctional inner-city areas, we serve customers who wish to park their car at convenient locations. With an increasing number of EV charging points we also offer our customers the opportunity to charge their electric vehicle while parked.

Value for partners

As a sustainable mobility partner, we know the value of partnering with a variety of sustainable mobility providers to offer complementary mobility solutions to residents, commuters and visitors of urban areas, encouraging active travel and public transport use.

Value for landlords

For public and private landlords, we offer a range of contract types and value propositions, which are supported by our business intelligence, unique digital solutions and price optimisation capabilities.

Value for society

We operate with a long-term perspective and from a solid financial basis. Our Corporate Sustainable Responsibility (CSR) report provides insight into how we serve society and improve liveability for years to come.
